

EMPLOYEE APPRAISAL PORTAL

Project Description:

Employee appraisal portal is a complete transformation of the employee appraisal process. It also includes all granular features of staff record maintenance but in regards to their skills and competencies. The application life cycle begins from employees, their managers, the projects they do including the progress status, task allocation and performance meter. It is developed with latest .NET technology using Flex as the major tool.

Incorporated HR process with the application allows the managers to manage leaves of staff members and also to find suitable candidates for the vacant positions in the organization. The application is an ideal package for medium to large organization where reviews and appraisals take a huge amount of time, resources and also uniformity is not guaranteed.
